United Nations A/63/310/Add.3

General Assembly

Distr.: General
21 August 2008

Original: English

Sixty-third session
Item 126 of the provisional agenda*
Human resources management

Consultants and individual contractors

Report of the Secretary-General

Summary

The present report, covering the period 2006-2007, is submitted pursuant to General Assembly resolutions 61/244, 59/266 and 57/305, in which the Secretary-General was requested to report biennially on the use of consultants and individual contractors in the Secretariat and the factors contributing to their use. In the light of General Assembly resolutions 60/266 and 61/276, the report provides information on their duties, with various statistical details both for the biennium and for each year of the reporting period, as recorded in the Integrated Management Information System.

In 2006-2007, 7,519 consultants and 3,509 individual contractors were engaged, which represents an increase compared to the previous biennium. The combined expenditure on consultants and individual contractors was $131.5 million, of which 69.7 per cent came from extrabudgetary sources.

The number of institutional contractors engaged during 2006-2007 decreased to 220, with fewer contracts and accrued months of engagement. The expenditure amounted to $6.1 million.

The General Assembly is invited to take note of the report.

I. Introduction

1. In section V of its resolution 57/305, the General Assembly requested the Secretary-General to report biennially, starting at the fifty-ninth session, on the use of consultants and individual contractors within the Secretariat and the regional commissions and the factors contributing to that, with statistics for each year of the two-year period, including information on their duties. In that resolution, the General Assembly also reaffirmed the guidelines, principles and comments contained in section VIII, paragraph 11, of its resolution 53/221, in which it requested the Secretary-General to continue to submit reports to the Assembly on consultants and individual contractors used by the United Nations, with an indication of their functions. This request was further reiterated in section XV of its resolution 61/244. In section III of its resolution 60/266 and reiterated in section IV of resolution 61/276, the Assembly requested the Secretary-General to ensure full utilization of synergies present in the United Nations system and to develop an effective evaluation mechanism for the use of outside expertise. It further requested the Secretary-General to ensure that the commissioning of external consultants in the Organization by senior management and programme managers was conducted according to established administrative procedures and financial regulations and rules, with full respect for the mandates of internal and external oversight bodies and the oversight role of the General Assembly, and to report thereon.

2. The present report contains consolidated data and information on the use of consultants and individual contractors during the biennium 2006-2007 as recorded in the Integrated Management Information System (IMIS). Statistical tables in the annex provide relevant data for each year of the two-year period as well as the biennium.

3. Modifications have been introduced in the statistical methodology in order to enhance the analytical value of the information provided to the General Assembly. The report reflects the aggregated engagement of consultants and individual contractors during 2006 and 2007 on a cumulative basis, regardless of the contractual start or end dates, while the previous report included only contracts that started during the reporting period. While affecting the comparability of data with the previous reporting cycle, the new methodology provides a more comprehensive picture of the resources dedicated to deliver mandated programmes. The report's tables reflect the differences between the net numbers of individual consultants and contractors and the aggregated numbers in other statistical breakdowns such as the number of engagements. This is due to the fact that some consultants and individual contractors were employed in more than one department/office and/or for different functions under more than one engagement. In addition, the data have been also aggregated by functional title.

4. In order to inform the General Assembly on the scope of locally recruited consultants and individual contractors in field operations, the report for the first time provides data on engagements of consultants and individual contractors as recorded by the Department of Field Support. These data are currently drawn from mission specific or local databases and are not recorded in IMIS for technical reasons, and are available on a snapshot basis; this renders the data incompatible with the methodology adopted in the present report. In future reports, data gathering for the statistics on consultants and individual contractors in peacekeeping missions

will be harmonized with that in IMIS, in order to provide a more comprehensive picture of the use of consultants and individual contractors.

5. Administrative instructions ST/AI/1999/7 and ST/AI/327 established the criteria regulating the use of consultants and individual contractors. The Office of Human Resources Management monitors the use of consultants and individual contractors, including their geographical and gender representation.

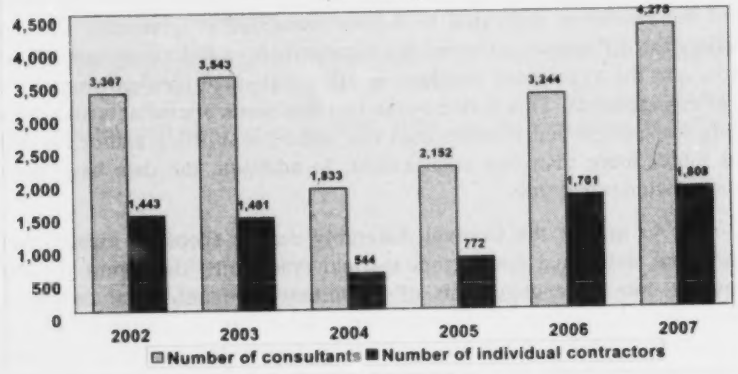
II. Review of statistical data

6. In 2006, a total of 3,244 consultants were employed on 4,294 contracts. Of these, 908 (28.0 per cent) were women, 106 (3.3 per cent) retirees, and 498 (15.4 per cent) non-retired former staff. In 2007, 4,275 consultants were employed on 5,713 contracts. Of these, 1,265 (29.6 per cent) were women, 152 (3.6 per cent) retirees, and 568 (13.3 per cent) non-retired former staff.

7. The number of individual contractors hired in 2006 was 1,701 (on 3,137 contracts). Of these, 904 (53.1 per cent) were women, 118 (6.9 per cent) retirees, and 552 (32.5 per cent) non-retired former staff. In 2007, 1,808 individual contractors were engaged on 3,101 contracts. Of these 975 (53.9 per cent) were women, 107 (5.9 per cent) retirees, and 447 (24.7 per cent) non-retired former staff. The total number of persons engaged as consultants and as individual contractors doubled from 2005 to 2006, while increasing slightly in 2007.

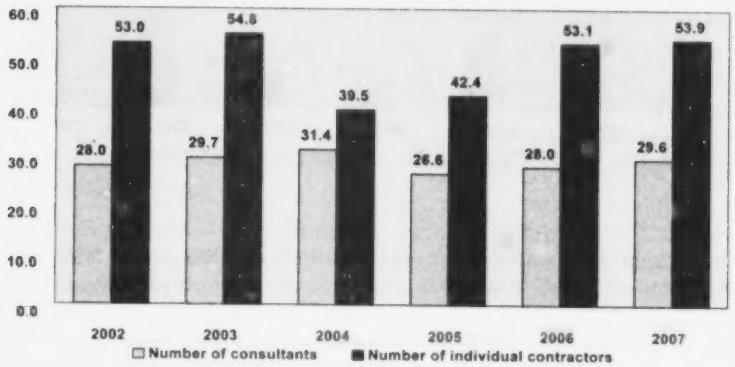
8. As compared to the biennium 2004-2005, the total number of consultants and individual contractors hired in 2006-2007 increased by 5,727 or by 108.0 per cent, which includes 3,534 more consultants (88.7 per cent increase) and 2,193 more individual contractors (166.6 per cent increase). Figure I illustrates the trend in the employment of consultants and individual contractors between 2002 and 2007. The increase is partially related to the expanded scope of data and the methodology adopted in the present report.

Figure I. Number of consultants and individual contractors (2002-2007)



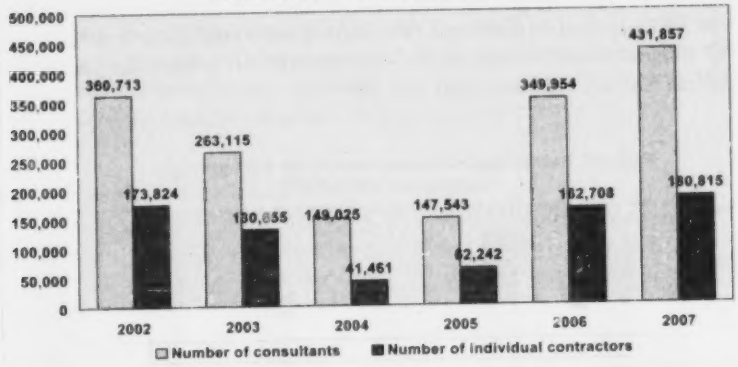
9. The percentage of women engaged as consultants grew from 26.6 per cent in 2005 to 28.0 per cent in 2006, and further increased to 29.6 per cent in 2007. The percentage of women engaged as individual contractors increased from 42.4 per cent in 2005 to 53.1 per cent in 2006 and then further increased to 53.9 per cent in 2007. Figure II illustrates the trends in the engagement of women as consultants and individual contractors between 2002 and 2007.

Figure II. Percentage of women consultants and individual contractors (2002-2007)



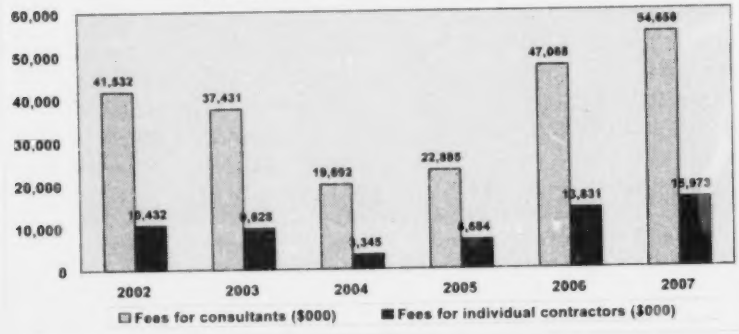
10. In 2006, consultants worked a total of 349,954 workdays (107.9 days per consultant on average), while in 2007 the total number of workdays increased to 431,857. Despite this overall increase, there was a reduction in the average number of days worked per consultant of 6.9 days less on average per contract in 2007 compared to 2006. Individual contractors in 2006 worked for 162,708 workdays (95.7 days per contractor on average), and 180,815 workdays in 2007 (100.0 workdays per contractor on average). In comparison with 2004-2005, the total number of days worked in 2006-2007 increased by 485,243 for consultants or by 163.6 per cent and by 239,821 for individual contractors or by 231.2 per cent. In the reporting period, the average duration of a consultancy contract increased by 12.4 days, while it decreased by an average of 0.4 days for individual contractors. Figure III illustrates the trend of workdays of consultants and individual contractors between 2002 and 2007.

Figure III. Number of days worked by consultants and individual contractors (2002-2007)



11. Consultants' fees amounted to $47.1 million in 2006 and to $54.7 million in 2007. As compared with 2004-2005, the total expenditure for consultants for the biennium 2006-2007 increased by $59.1 million (138.9 per cent). For individual contractors, the total expenditure amounted to $13.8 million in 2006 and $16.0 million in 2007. The total expenditure for an individual contractor contract in the biennium 2006-2007 represents an increase of $19.8 million (197.2 per cent) over the biennium 2004-2005. The average cost of a consultant contract in 2006-2007 was $10,165, or an average of $737 more per contract than in 2004-2005. In contrast, the average cost of individual contractors was $4,778 in 2006-2007 or $585 less than in 2004-2005. The average daily cost of a consultant in 2006-2007 was $130.1 ($13.5 less than in 2004-2005), and the average daily cost of an individual contractor was $86.8 per day ($9.9 less than in 2004-2005). In 2006-2007, the combined expenditure on consultants ($101.7 million) and individual contractors ($29.8 million) totalled $131.5 million. Figure IV illustrates the trend of expenditures on consultants and individual contractors between 2002 and 2007.

Figure IV. Fees paid to consultants and individual contractors (in thousands of dollars 2002-2007)



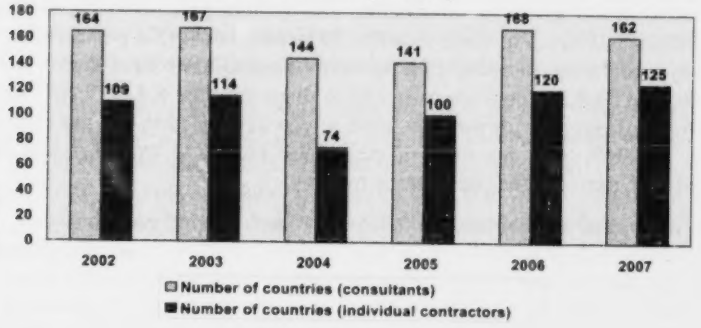
12. Table 2 in the annex contains data on the consultants and individual contractors locally recruited in field missions as provided by the Department of Field Support. The number of locally recruited consultants and individual contractors in field missions administered by the Department of Field Support in 2007 (30 September) was 176 and 2,260 respectively, which is considerably lower than in 2006 (30 November). The geographical diversity of personnel in these categories is limited since it depends on the location of the field operations. The gender breakdown is not available for 2006, but in 2007, 18.2 per cent of the total number of locally recruited consultants and individual contractors were women.

13. In 2006, consultants were engaged from 168 countries. Fewer than 100 consultants were hired from 161 countries, between 100 and 149 from 5 countries (Argentina, Canada, Chile, France, Kenya), and 150 or more from 2 countries (United Kingdom, United States). Individual contractors came from 120 countries. Fewer than 100 individual contractors were engaged from 115 countries, between 100 and 149 from 2 countries (Ethiopia, United States), and 150 or more from 2 countries (France, Kenya).

14. In 2007, consultants were engaged from 162 countries. Fewer than 100 consultants were engaged from 151 countries, between 100 and 149 from 7 countries (Argentina, Australia, Brazil, Chile, Germany, Italy, Kenya), and 150 or more from 4 countries (Canada, France, United Kingdom, United States). Individual contractors came from 125 countries. Fewer than 100 individual contractors were engaged from 121 countries, between 100 and 149 from 1 country (France), and 150 or more from 3 countries (Chile, Ethiopia, United States).

15. Figure V illustrates the trend in the number of countries of origin represented in the engagement of consultants and individual contractors over the period 2002 to 2007, while table 3 in the annex details the nationality of these types of personnel for 2006-2007.

Figure V. Number of countries represented by consultants and individual contractors (2002-2007)



16. Among the main purposes for the engagement of consultants during 2006-2007 (see table 4 in the annex) were programme implementation (17.2 per cent in 2006 and 15.4 per cent in 2007) and advisory services (16.2 per cent in 2006 and 15.3 per cent in 2007), in continuation of the 2004-2005 trend. The main areas of engagements of individual contractors, also similar to the previous biennium, related

to preparation of meetings (13.7 per cent in 2006 and 7.8 per cent in 2007), lectures and training courses (10.7 per cent in 2006 and 8.9 per cent in 2007), advisory services (9.1 per cent in 2006 and 9.8 per cent in 2007) and programme implementation (6.5 per cent in 2006 and 7.1 per cent in 2007).

17. In 2006, the largest occupational group of consultants performed professional, managerial and technical work (580 contracts, 13.5 per cent), followed by economists (472 contracts, 11.0 per cent), technical cooperation (330 contracts, 7.7 per cent), staff training and development specialists (265 contracts, 6.2 per cent) and social scientists (214 contracts, 5.0 per cent). In 2007, economists constituted the largest occupational group of consultants (702 contracts, 12.3 per cent), followed by professional, managerial and technical work (666 contracts, 11.7 per cent), technical cooperation (540 contracts, 9.5 per cent), staff training and development specialists (469 contracts, 8.2 per cent), and writing, translation and interpretation related (244 contracts, 4.3 per cent). This trend is similar to the previous biennium.

18. In 2006, the largest occupational group of individual contractors was teachers (220 contracts, 7.0 per cent), followed by meeting services related (219 contracts, 7.0 per cent), writing, translation and interpretation related (208 contracts, 6.6 per cent), interpreters (176 contracts, 5.6 per cent) and secretarial support (139 contracts, 4.4 per cent). In 2007, the largest occupational group represented was writing, translation and interpretation related (180 contracts, 5.8 per cent), followed by secretarial support (152 contracts, 4.9 per cent), interpreters (146 contracts, 4.7 per cent), translators and revisers (139 contracts, 4.3 per cent) and teachers (133 contracts, 4.3 per cent). This continues the trend noted in the previous biennium.

19. Two departments used 56.9 per cent of all consultants hired for a period of more than one year — the Office for the Coordination of Humanitarian Affairs (emergency relief specialists — 110, professional, managerial and technical work — 102), and UN-Habitat (professional, managerial and technical work — 15).

20. Most contracts given to consultants and individual contractors during 2006-2007 had durations of up to three months; 399 consultants (5.3 per cent) were hired for more than one year. In 2006, 26.6 per cent of consultants were hired for less than one month, and 34.3 per cent for over one to three months. 5.4 per cent of contracts had durations of one year or more in 2006 which decreased to 4.6 per cent in 2007. Similarly, in 2007, 30.6 per cent of consultant contracts were for less than one month and 34.6 per cent for one to three months.

21. For individual contractors, in 2006, 40.6 per cent of contracts were for less than one month and 36.5 per cent for one to three months. In 2006, 1.3 per cent of contracts had durations of one year or more and in 2007 it was 1.5 per cent. In 2007, 36.7 per cent of contracts of individual contractors were for less than one month and 35.7 per cent for one to three months, which was consistent with the trend in the previous biennium.

22. In terms of the actual days worked within the contractual period for consultants, in 2006, 32.6 per cent worked for less than one month, 36.3 per cent worked for one to three months and 3.7 per cent worked for one year or more. In 2007, the distribution was 37.1 per cent, 35.7 per cent and 3.4 per cent, respectively.

23. In terms of the actual days worked within the contractual period for individual contractors, in 2006, 45.5 per cent worked for less than one month, 32.5 per cent worked for one to three months and 0.5 per cent worked for one year or more. In 2007, the distribution was 40.7 per cent, 32.8 per cent and 0.6 per cent, respectively.

24. In 2006, 10 departments and offices used 76.4 per cent of all consultants and individual contractors; the Economic Commission for Latin America and the Caribbean (ECLAC) (14.1 per cent), the United Nations Environment Programme (UNEP) (11.4 per cent), the United Nations Conference on Trade and Development (UNCTAD) (10.1 per cent), the Department of Economic and Social Affairs (DESA) (6.9 per cent), the Economic Commission for Africa (ECA) (6.7 per cent), the United Nations Office at Nairobi (UNON) (6.6 per cent), the Economic and Social Commission for Asia and the Pacific (ESCAP) (5.9 per cent), UN-Habitat (5.4 per cent), ESCWA (5.2 per cent) and the Office for the Coordination of Humanitarian Affairs (4.3 per cent).

25. In 2007, eight offices and departments accounted for 67.5 per cent of all consultants and individual contractors. The largest users of consultants and individual contractors were ECLAC (45.2 per cent), UNEP (11 per cent), UNCTAD (9.1 per cent), the Department of Economic and Social Affairs (8.5 per cent), the Economic Commission for Africa (ECA) (7.5 per cent), ESCAP (6.0 per cent), ESCWA (5.3 per cent) and UN-Habitat (5.0 per cent). In 2006-2007, ECA, ECLAC, UNCTAD and UNEP significantly increased the use of consultants and individual contractors, both in terms of the number of individuals as well as the number of contracts.

26. In terms of educational levels, 71.4 per cent of consultants and individual contractors in 2006 held a university degree (20.6 per cent held a Ph.D., 28.9 per cent a master's degree, and 21.9 per cent a bachelor's degree), while 28.6 per cent had no university degree. The majority of performance evaluations (95.3 per cent) were satisfactory while 0.3 per cent reflected unsatisfactory performance. In 2007, 75.2 per cent of persons engaged held a university degree (21.9 per cent held a Ph.D., 31.3 per cent a master's degree, and 22.0 per cent held a bachelor's degree), while 24.8 per cent had no university degree. 92.0 per cent of the performance evaluations were satisfactory, and 0.3 per cent were unsatisfactory.

27. In 2006, $60.9 million were paid in fees to consultants and individual contractors from all sources of funding. The cost of consultants was $47.1 million (25.8 per cent from the regular budget and 74.2 per cent from extrabudgetary sources) while the cost of individual contractors was $13.8 million (46.0 per cent from the regular budget and 54.0 per cent from extrabudgetary sources). The Department of Economic and Social Affairs, the Department of Political Affairs, ECLAC, UNCTAD, UNEP and UN-Habitat paid more than $3 million each in fees to consultants. Combined, the regional commissions (ECA, the Economic Commission for Europe, ECLAC, ESCWA and ESCAP) paid 18.7 per cent of the total consultants' fees. The majority of departments spent less than $800,000 in fees to individual contractors.

28. In 2007, the total expenditure for consultants and individual contractors was $70.6 million from all sources of funding ($9.7 million more than in 2006, an increase of 15.9 per cent). Consultants' expenditures amounted to $54.6 million (26.4 per cent from the regular budget and 73.6 per cent from extrabudgetary sources), while expenditure on individual contractors totalled $16.0 million

(43.4 per cent from the regular budget and 56.6 per cent from extrabudgetary sources). The Department of Economic and Social Affairs, ECLAC, UNCTAD, UNEP and UN-Habitat paid more than $4 million each in fees to consultants. The regional commissions paid 21.7 per cent of the total consultants' fees, while the majority of departments spent less than $1 million in fees to individual contractors.

29. Total combined fees paid to consultants and individual contractors during 2006-2007 amounted to $131.5 million ($101.7 million for consultants and $29.8 million for individual contractors), including $39.9 million (30.3 per cent) from the regular budget and $91.6 million (69.7 per cent) from extrabudgetary sources. This represents an increase in expenditures as compared to the previous biennium.

30. There were 126 institutional contractors engaged in 2006 and 94 institutional contractors engaged in 2007. The total expenditure on institutional contractors decreased from $3.8 million in 2006 to $2.3 million in 2007, which resulted from the overall decrease both in the number of contracts (from 153 in 2006 to 109 in 2007) and in the average duration of contracts (from 555 months in 2006 to 227 months in 2007). Compared to the previous biennium, an overall reduction of the number of institutional contractors hired, the number of contracts granted and the accrued months of engagement was noted. This overall reduction also resulted in a net decrease of total expenditure by $3.8 million (38.5 per cent).

III. Development of roster of consultants

31. In 2008, the Office of Human Resources Management undertook a survey of the rosters of consultants maintained by individual departments. The purpose of the survey was to gather necessary information for the development of a centralized roster of consultants. This is in line with the request of the General Assembly in section II of its resolution 60/266 and the recommendation of the Board of Auditors (A/59/5 (Vol. I)).

32. The results of the survey indicate that about one third of departments and offices utilize some type of a roster, either electronic or manual. The sizes of rosters differ from 40 entries to over 2,500. Some departments also have access to the rosters of other United Nations system entities. All rosters captured such details as type of expertise, educational background, language skills and contact details of the candidates. The survey identified several challenges, including populating rosters with the appropriate types of candidates, and effectively identifying suitable matches. It is envisaged that a global roster of consultants could be incorporated into the future Enterprise Resource Planning.

IV. Conclusions

33. In 2006-2007, more consultants and individual contractors from a larger pool of nationalities were engaged than in the biennium 2004-2005, with an increase in the number of contracts granted, the duration of engagements and the total expenditure. The average cost of the consultant or individual contractor contracts was lower in 2006-2007 than in 2004-2005. The percentage of women consultants steadily increased and gender parity was reached in the case of individual

contractors. For both years of the reporting period, consultants were mostly engaged for programme implementation and advisory services, while individual contractors were used mainly for preparation of meetings, lectures and training courses as well as advisory services.

34. The Department of Economic and Social Affairs, ECA, ECLAC, UNCTAD and UNEP engaged the majority of consultants and individual contractors. The number of institutional contractors and the related expenditure were significantly reduced in 2006-2007 compared with the previous biennium.

35. Among factors contributing to the use of consultants and individual contractors was a worldwide growth in the demand for conference, interpretation and translation services during peak activity periods which exceeded departmental capacity. Likewise there was a significant increase in disaster relief operations and in field operations in peacekeeping. For example, the Office for the Coordination of Humanitarian Affairs coordinated the relief for the 2006 Indonesia earthquake, the 2007 Peru earthquake, the 2007 Indonesia floods and the 2007 Bangladesh cyclone. Also, since 2004, 16 new or expanded peacekeeping operations were authorized.

36. For some departments, the increase in the use of consultants and individual contractors was a result of new projects, such as the Enterprise Resource Planning system and the capital master plan. These projects required considerable business analysis and specific expertise not readily available in the Organization. Some departments also cited an increased requirement for higher level advisory services.

37. **The Secretary-General invites the General Assembly to take note of the present report.**

Definitions

Professional, managerial and technical work: This group includes occupations concerned with the theoretical or practical aspects of such fields of human endeavour as art, science, engineering, education, medicine, law, business and economics, and administrative, managerial and technical work. Most of these are occupations that require substantial academic preparation, usually at the university level.

Support work related to professional, managerial and technical occupations: This group includes occupations concerned with recording, compiling, reviewing and processing data; classifying, filing, retrieving and updating publications, correspondence and other reference materials; providing information; transmitting mail and messages; coordinating meetings and inspections; and carrying out other duties in accordance with established practices and procedures in support of occupations responsible for the management, creation, analysis and presentation of plans and programmes. The occupations included in the support group may also involve the performance of technical work in specific subject area where practical application rather than theoretical knowledge is required.

Production, service and transport work: This group includes occupations concerned with operating equipment; providing transport services; providing protection against crime, fire and accidents; providing food service; storing distributing and accounting for materials; fabricating, erecting, installing, paving, painting, repairing and similarly working on structures and structural parts; and using manufactured components and assemblies to produce products. Many of these occupations require the application of the knowledge and physical skills of a craft or trade.
